FIELD MARKERS

We supply a comprehensive range of high-quality field and underground markers, specifically designed for the demanding conditions of mining, construction, and exploration environments. Our products provide exceptional durability, visibility, and reliability to ensure accurate markings in both surface and underground operations.

Our Product Range Includes:

- Wax Crayons: for writing on rough, wet, or dusty surfaces.
- Paint Markers: Permanent marking on any surface whether wet, dry, oily rough or smooth.
- Chalk Markers - temporary marking on slightly abrasive to rough surfaces: roads, railroads, rock, cement, rubber
- Underground Spray Paint: for high-visibility marking in low-light or dusty environments
Available in various colours for easy identification.
